APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit is issued subject to existing rights. It is understood that the amount of water herein granted is only a temporary allowance and that the final water right obtained under this permit will be dependent upon the amount of water actually placed to beneficial use. It is also understood that this right must allow for a reasonable lowering of the static water level. This well shall be equipped with a two (2) inch opening for measuring depth to water. If the well is flowing, a valve must be installed and maintained to prevent waste. A totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of water begins, or before the Proof of Completion of Work is filed. This source is located within an area designated by the State Engineer, pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The well must be sealed with cement grout, concrete grout or neat cement from ground level to 100 feet.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

This permit is issued for the irrigation of 28.76 acres within the described place of use.

A portion of the proposed place of use under this permit has water appurtenant to it from Lamoille Creek under Humboldt River Proof 00404 and Permit 1408, Certificate 11219 and as such, water under this permit can only be used on said portion when water is not available from Lamoille Creek.

(CONTINUED ON PAGE 3)

The amount of water to be changed shall be limited to the amount, which can be applied to beneficial use, and not to exceed 0.70 cubic feet per second, but not to exceed 86.28 acre-feet annually, and not to exceed a yearly duty of 3.0 acre-feet per acre of land irrigated from any and/or all sources.

Work must be prosecuted with reasonable diligence and be completed on or before:

June 5, 2008

Proof of completion of work shall be filed on or before:

July 5, 2008

Water must be placed to beneficial use on or before:

June 5, 2011

Proof of the application of water to beneficial use shall be filed on or before:

July 5, 2011

Map in support of proof of beneficial use shall be filed on or before:

July 5, 2011

IN TESTIMONY WHEREOF, I, HUGH RICCI, P.E.,

State Engineer of Nevada, have hereunto set

my hand and the seal of my office,

this 5<sup>th</sup> day of June, A.D. 2006

  
State Engineer
